

Diets of some New Zealand birds

This task is about using information to complete a table.

New Zealand bird	Food eaten by this bird
Black backed gull	Shellfish, fruit, and a wide range of other food
Fantail	Insects
Kereru	Leaves, flowers, and fruit
Kiwi	Worms, seeds, and fruit
Morepork	Insects, spiders, lizards, and mice
Rifleman	Insects and spiders
Tui	Nectar, fruit, and large insects like cicadas and stick insects
Waxeye	Fruit

Use the information above about diets of some New Zealand birds to fill in the table below. List each bird in the table only once.

A Which birds are herbivores?	B Which birds are omnivores?	C Which birds are carnivores?
