

Paradise Ducks' life cycle

This task is about the life cycle of a paradise duck.

a) Sort the four pictures of the Paradise Duck in order from the youngest to oldest.

The four pictures are arranged in a 2x2 grid. The top-left picture shows an adult Paradise Duck with dark brown and white feathers standing in a grassy area. The top-middle picture shows a group of ducklings with dark brown and white feathers standing in a grassy area. The top-right picture shows several duck eggs in a nest. The bottom-left picture shows a group of ducklings with dark brown and white feathers sitting in a grassy area.

b) Write down some ways that the Paradise duck has changed from the first picture to second picture.

c) Write down some ways that the Paradise duck has changed from the first picture to second picture.

d) Write down some ways that the Paradise duck has changed from the first picture to second picture.

d) Paradise Ducks belong to the larger animal group known as birds.

Write down **three** ways that you can tell a duck is a bird.
