

Paradise Ducks' life cycle

This task is about the life cycle of a paradise duck.

a) Sort the four pictures of the Paradise Duck in order from the youngest to oldest.

The complex block contains four images in a grid. The top row has three images: an adult Paradise Duck with a white patch on its back, a group of ducklings, and a nest of duck eggs. The bottom row has one image: a group of ducklings.

The complex block contains two images. The left image shows a nest of duck eggs, and the right image shows a group of ducklings.

b) Write down some ways that the Paradise duck has changed from the first picture to second picture.

A large empty rectangular box for writing the answer to question b).

c) Write down some ways that the Paradise duck has changed from the first picture to second picture.

d) Write down some ways that the Paradise duck has changed from the first picture to second picture.

d) Paradise Ducks belong to the larger animal group known as birds.

Write down **three** ways that you can tell a duck is a bird.
