## How animals move

## This task is about how parts of animals help them move.

Animals have different ways of moving through the air, water, trees, and along the ground. Look at each picture and write down which part(s) of its body the animal uses to move with, and how this body part works.

a)		Part used
	*	How this part works
	71	
	A bat flying	
b)	W	Part used
		How this part works
	A kangaroo running	
	A kangaroo running	
c)		Part used
		How this part works
	A dolphin swimming	
d)		Part used
	6.9	How this part works
	(	
	A possum climbing
