

Parts of a human

This task is about identifying the purpose of parts of the human body.

Drag the purposes to the parts of the body. Two purposes will be left over.

- | | | | | | |
|---|-------------------------------------|---|--|---|------------------------------|
| Used for moving arms and legs
Where oxygen gets into our blood | Tastes food
A frame for the body | Used for seeing
Pumps blood around your body | Tells your body what to do
Keeps your body warm | Helps digest our food
Used for hearing | Protects your body
Smells |
|---|-------------------------------------|---|--|---|------------------------------|
