

# Functions of plant parts

---

Draw a line from the plant function, to the part of the plant that performs the function.  
One part is not needed.

## Plant function

## Part of plant

Take water into the plant

Leaves

Main area for making  
food

Stems

Attract insects so that  
seed forming occurs

Berries

Support the leaves

Roots

Help the plant to hang  
on and climb

Tendrils

Take in gases for  
respiration and  
photosynthesis

Leaves

Flowers
