

## Animal groups II

This task is about using the features of animals to work out which group they belong to.

a) i) Select all the features that are true for the Giant weta.

<input type="radio"/> lives on both land and water	<input type="radio"/> has feathers	<input type="radio"/> young feed on milk	<input type="radio"/> has antennae	<input type="radio"/> can breathe through skin
<input type="radio"/> has 6 legs	<input type="radio"/> warm blooded	<input type="radio"/> has fins	<input type="radio"/> lays eggs	<input type="radio"/> has scales
<input type="radio"/> has fur/hair	<input type="radio"/> has wings	<input type="radio"/> has a beak	<input type="radio"/> has gills	<input type="radio"/> has 3 body parts

ii) Which group does the animal belong to?

<input type="radio"/> Insect	<input type="radio"/> Reptile	<input type="radio"/> Mammal	<input type="radio"/> Bird	<input type="radio"/> Amphibian	<input type="radio"/> Fish
------------------------------	-------------------------------	------------------------------	----------------------------	---------------------------------	----------------------------

b) i) Select all the features that are **true** for the Possum.

<input type="radio"/> lives on both land and water	<input type="radio"/> has feathers	<input type="radio"/> young feed on milk	<input type="radio"/> has antennae	<input type="radio"/> can breathe through skin
<input type="radio"/> has 6 legs	<input type="radio"/> warm blooded	<input type="radio"/> has fins	<input type="radio"/> lays eggs	<input type="radio"/> has scales
<input type="radio"/> has fur/hair	<input type="radio"/> has wings	<input type="radio"/> has a beak	<input type="radio"/> has gills	<input type="radio"/> has 3 body parts

ii) Which group does the animal belong to?

Insect

Reptile

Mammal

Bird

Amphibian

Fish

c) i) Select all the features that are true for the Duck.

lives on both land and water

has feathers

young feed on milk

has antennae

can breathe through skin

has 6 legs

warm blooded

has fins

lays eggs

has scales

has fur/hair

has wings

has a beak

has gills

has 3 body parts

ii) Which group does the animal belong to?

Insect

Reptile

Mammal

Bird

Amphibian

Fish

d) i) Select all the features that are true for the Frog.

lives on both land and water

has feathers

young feed on milk

has antennae

can breathe through skin

has 6 legs

warm blooded

has fins

lays eggs

has scales

has fur/hair

has wings

has a beak

has gills

has 3 body parts

ii) Which group does the animal belong to?

Insect

Reptile

Mammal

Bird

Amphibian

Fish
