

Is it a mammal, bird, or reptile?

Mammals, birds, and reptiles are all animals. One of the ways we can sort animals into their groups is by looking at their features (what they look like). For each animal below tick the features of that animal in the boxes provided.

Some features may be found in more than one group. The first one has been started for you. This shows that this animal has fur.

	a) 	b) 	c) 
Feature	Seal	Crocodile	Penguin
fur	✓		
warm-blooded			
lays eggs			
feathers			
cold-blooded			
gives birth to live young			
skin covered with scales			
This animal belongs to	_____ group.	_____ group.	_____ group.

d) i) What is 1 feature that birds and reptiles have in common? _____

ii) What is 1 feature of birds that is different from mammals? _____
