

Sienna's spider

This task is about features of a spider.

Sienna found this animal in her garden and took it to school. She thought it was an insect, but Jess said it was a type of spider.

Spiders	Insects
8 legs	6 legs
2 parts to body	3 parts to body
	antennae (feelers)
skeleton on the outside	skeleton on the outside

What are **two** features that Jessica could use to decide that it was a spider and not an insect?

1.

2.
