

Buying bikes

This task is about working the discount percentages of amounts of money.

Te Ariki, Ani, and Tafata want to buy new bikes.

The bike shop in town has a sale advertisement in their window for each bike.

Read each advertisement and answer the questions to show how much money could be saved when buying the bikes in the sale.

How much money will Te Ariki save if he buys this bike? \$

How much money will Ani save if she buys this bike? \$

How much money will Tafata save if she buys this bike? \$

How much money will be saved if one of the children buys this bike? \$
