# Toy car collections

This resource is about comparing information on two graphs.
Ethan wanted to find an answer to his question.
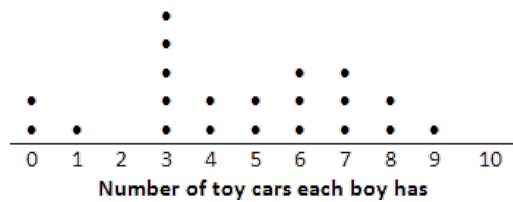

> Do boys in Naenae usually have more toy cars than boys in Taita?

He drew two graphs with the data he collected.

Toy cars owned by boys in Naenae

Number of toy cars each boy has

Toy cars owned by boys in Taita

Number of toy cars each boy has

Which of these statements **best** describes these two graphs?
(select one)

○ Boys in Naenae usually own more toy cars than boys in Taita.

○ Boys in Naenae usually own fewer toy cars than boys in Taita.

○ Boys in Naenae own about the same number of toy cars as boys in Taita.

○ Boys in Naenae own 4 toy cars each.
