

Food for the hāngī

This task is about working out total amounts of food.

Niko needs to make sure there will be enough food for everyone at the hāngī.

Each person will get:

- 4 pieces of kumara
- 2 pieces of chicken
- 3 pieces of potato

There will be 23 people at the hāngī.

Write the total number of pieces of each type of food Niko will need.

- a) kumara (4 pieces each) pieces
- b) chicken (2 pieces each) pieces
- c) potato (3 pieces each) pieces
